Sneaky Uses For Everyday Things

Synopsis

Sneaky Uses for Everyday Things is a valuable resource for transforming ordinary objects into the extraordinary. With over 80 solutions and bonus applications at your disposal, you will be ready for almost any situation. Do you know how to make something that can tell whether the \$20 bill in your wallet is a fake? Or how to generate battery power with simple household items? Or how to create your own home security system? Science-savvy author Cy Tymony does. And now you can learn how to create these things and more than 40 other handy gadgets and gizmos in Sneaky Uses for Everyday Things. More than a simple do-it-yourself guide, this quirky collection is a valuable resource for transforming ordinary objects into the extraordinary. With over 80 solutions and bonus applications at your disposal, you will be ready for almost any situation. Included are survival, security, self-defense, and silly applications that are just plain fun. You'll be seen as a superhero as you amaze your friends by:

- * Transforming a simple FM radio into a device that enables you to eavesdrop on tower-to-air conversations.
- * Creating your own personalized electronic greeting cards.
- * Making a compact fire extinguisher from items typically found in a kitchen pantry.
- * Thwarting intruders with a single rubber band.

By using run-of-the-mill household items and the easy-to-follow instructions and diagrams within, you'll be able to complete most projects in just a few minutes. Whether you use Sneaky Uses for Everyday Things as a practical tool to build useful devices, a fun little fantasy escape, or as a trivia guide to impress friends and family, this book is sure to be a reference favorite for years to come.

Customer Reviews

This book isn't / doesn't include 1500 uses for vinegar or how toothpaste gets rid of pimples. Nope, this book and its sequel (Sneakier Uses ...) is chock full of simple gadgets and science experiments you can build in your home using coins, magnets, leaves, etc. Any boy and a lot of girls would love to spend time with a parent, uncle/aunt or godparent putting this Spy Stuff/Survival Equipment/Home Security Systems together. Included are sneaky sources of power (a battery using coins or fruit); how to scavenge wire (to connect your sneaky battery to something); how to use Mother Nature to help you survive in the wilderness; build radios, amplifiers and wireless microphones (baby monitor?); lights, alarms, telescope. There is also a "Green Lantern" magic ring to control the objects you make. So let's see: Build useful stuff for the home, office, outdoors; spend time with your kids; teach them some science, creativity, frugality, recycling, how to protect themselves, how to survive. That makes this quite a full package. When I let one youngster read the table of contents it elicited a series of "ooo's" from him. But you can judge for yourself by using the "Search Inside" feature above. Just the entry on making your own form-fitting ice pack to place on your strains and sprains makes it worth the price! As for some previous comments, they are cynical and have no soul and no imagination. They knock the book as nothing more than common sense. I'd like to have seen one make a radio from a toilet paper roll and a penny with no directions, just common sense.
