# COPD Exercises 2013: 50 Activity Ideas For Chronic Obstructive Pulmonary Disease Patients

## Synopsis

Chronic obstructive pulmonary disease, or COPD, though the term sounds so medical and unfamiliar, is actually a common disease among the human population. Typically, the airflow to the lungs is obstructed, which results to shortness of breath and cough. As it is usually caused by smoking, it is foreseen to be the 4th leading cause of death in the world come 2030. It sounds dangerous, so if you're stuck with COPD, you can eventually get yourself out of it. But it takes a lot of work- and the most would come from you. Studies show that people with COPD engaged in exercising see improvement in their breathing and life. And don't fret about the exercise being physical because it is good. You do need it to get better, just make sure you do it the right way and with guidance from your doctor. Discover inside this book the 50 ways to get involved in helpful COPD activities

What's in the book

1. Take a walk
2. Go under pulmonary rehabilitation
3. Lose weight
4. Eat healthy
5. Create your own music video
6. Conjure some art
7. Go jogging
8. Bike around
