## **Customer Reviews**

I used the Saunders NCLEX-PN book for the NCLEX-LVN in 2011. I passed in 85 questions. So I knew I had to continue using Saunders material when I got into RN school. I got into RN school in the summer of 2012 and immediately bought this book, thinking it was the review book. I was disappointed when I got it, because the questions are VERY random so I could not use it for school. I ended up buying the yellow Saunders Review NCLEX-RN book once I realized what I did.

BUT--now that I am graduated and reviewing for NCLEX-RN, I am so happy I messed up and bought this Q&A book. The questions are challenging, thought provoking and analytical. There is such a wide array of questions from pregnancy, infant care, children's diseases, adult, management, dosage calculations, teaching, delegation, priority, select all that apply, ICU care, diagnostics, labs, meds, ethics, ABG's, psych, communication and probably even more topics I can't think of! If you are weak in an area, I would refresh using the yellow, Saunders Review book. However, I have found the rationales are so detailed in this Q&A book compared to other sources I used, I don't have to refer back to the Review book much. I would certainly recommend this book for NCLEX....but if you are looking for a review book for school, pass this one up and go with one that is organized like: Saunder's Review, Lippincott's Q&A, NCLEX-RN made Incredibly Easy Q&A or Kaplan. This book does have the answers and rationales are right next to the question. For people who weren't smart enough to get an index card to cover the answer- so you won't cheat yourself and just answer without thinking...that's all you need to do.
