Customer Reviews

I love the way the author clarifies terms.....have always heard we should raise our vibrations and she is the first author to really explain what this means and how to do it. This whole book makes you happy.

Superb treatment of the thorny issues related to why people don't seem to achieve the things, situations, or individual relationships they believe they deserve. As Ms. West elegantly points out, you need to begin with your core belief system mechanics. A "how to" label for this book to doesn't do this treatise justice; but, that is just what it is -- a "how to" guide to manifest changes in your life.

"How to" with a soulful approach to re-tuning your habits to maximize your time in pursuing your dreams and goals. I would have gladly paid \$99.99 for this information. I hope to see many more books of this caliber from Linda West. Bravo.

I really enjoyed this ebook. There were several ideas and tips that I'd never read before. One of my favorite tips is regarding how to manifest your desires quickly. Similar to other ebooks about the topic, visualizing your desires is recommended. What's interesting is the suggestion to visualize your desire as if you were watching a movie and when the excitement starts to fade, visualize telling your family and friends about what great thing has happened. This keeps you in that high vibration longer, which is where you will begin to attract your desires. I think most people will get useful information from reading this ebook.

Linda West lays it all in simple easy steps. She shows you how to obtain the things you dream of simply and easily. This is a MUST READ. It changed my life and I'm sure it will change yours too!

I'm exploring the processes around manifesting and I am trying to be optimistic that this book holds some credibility, but unfortunately that is pulled into question by the absolutely poor writing that is simply a continuous distraction...one has to struggle and wade through the language to try and figure out the point she's trying to make. Statements like "to put it simply.." I find myself thinking, wait you didn't say anything yet, so what are we making simple.. you didn't say anything yet.. " Everything from grammar to speaking to the reader as if they've read something else previously in the book but have never mentioned. I'm guessing or hoping the author had good intentions in writing this book, but have to wonder how PRESENT she was in publishing something, that if she deemed to be such an important subject, would have been given due diligence and communicated in a clear manner. That said, maybe writing and thinking about the final product is not one of her strengths. And then perhaps manifesting is a strength. Time may tell as I do intend to practice some of these steps. Giving benefit of the doubt but wondering if I'm going through 5 steps from someone who didn't give them much thought.

Lester Levenson taught this , but did not lay it out in a systematic way like Linda West. Levenson's teachings brought us the ultimate truth, and now Linda West has opened up a very practical way to manifest our desires. Get this book and her teachings along with Lester's insights on truth and test it out for yourself. You will have the proof.

After reading so many books on the market regarding manifesting, and getting the life you want, This book, "Manifest in 5 Easy Steps" goes beyond to help you find the secrets The Secret never told you. Linda West lays it out for you and takes all the guess work out of the equation. Her methods for manifesting is so easy, you wonder why it took so long to figure it out. Loved her style of writing. I felt like she was sitting in the room with me having a conversation.

I truly am filled with gratitude for this author and the simple, clear and concise way she communicates these powerful concepts. I've read many books on this topic but this is so joyous and yet practical. Thank you for your gift to humanity.
