Project Kid: Crafts That Go!: 60 Imaginative Projects That Fly, Sail, Race, And Dive

Synopsis

Thomas the Tank Engine. Hot Wheels. Mike Mulligan and His Steam Shovel. Richard Scarry's Cars and Trucks and Things That Go. Kids' fascination with vehicles is insatiable. In Project Kid: Crafts That Go!, that excitement is translated into more than 60 inventive craft projects for parents to make with and for their children. The book is organized into seven chapters: City, Rails, Sky, Space, Water, Country, and Dirt. There are police cars and ice cream trucks; circus trains and submarines; helicopters, rocket ships, cement mixers, and school buses. And because the car-obsessed kid doesn't just want a new vehicle to play with—he wants a racetrack, his very own driver's license, maybe even a child-sized gas station—each chapter includes not only toys but also thematic clothing, decor, accessories, and more. Projects feature clear instructions and step-by-step photographs wherever they are needed, easy for both kids and non-crafty adults to understand.

Book Information

Paperback: 272 pages

Customer Reviews

I preordered Project Kid and it didn't disappoint! The crafts are creative and incredibly accessible to a mom like me who isn't that creative. And the book itself is beautiful. My kids are enjoying looking at the pictures as well. I already bought the book for two friends as gifts.

This is a beautiful book, with enticing ideas and photos of real kids that will draw in your little ones.

It's great for boys and girls. And if you are interested in re-using household items, this book is filled with ideas to accomplish that. If you don't usually craft, Project Kid can help you get started. Perfect birthday or holiday gift.

This book is packed with colorful and interesting projects. How could a parent or kid not want to dive into these? The book has easy to follow directions and, what I liked best, pictures exactly what you need in both list form and picture form as well as a reference guide for the craft tools needed and when/how to use them. Very impressive. Great gift for kids and their parents!

I was very excited to receive this author's second book. It's wonderful! I bought it for my grandchildren and can't wait to share the colorful, imaginative ideas. The instructions are clearly written and will provide hours of fun.

I absolutely loved this book. The book has an incredible variety of transportation projects. Some are very basic, while some are a little more advanced. The thing I truly love is the fact that the author has step by step pictures of the advanced projects. Sometimes when I am making something, it is hard for me to figure out how something is supposed to go. Well, this takes the guesswork out. The instructions are clear and concise, easy to understand and follow. The crafts are so creative and fun. Many of the items needed to make these are regular household items, so cost is minimum. There are many different things I could easily make for my classroom, but I can't wait to make some of these projects with my son. I need to look into the author's first book as well. This will be going into my school library for project ideas.
