Clinical Immunology Of The Dog And Cat (A Color Atlas)

Synopsis

The science of immunology is relatively new, complex, and rapidly growing. This new reference leads the reader from basic immunological principles to their practical application in the diagnosis and treatment of immune-mediated diseases of the dog and cat. An excellent resource for veterinarians in practice and in training, *Clinical Immunology of the Dog and Cat* provides information on such topics as immunodeficiency disease, immune system neoplasia, and immunotherapy. Illustrations, including 670 color diagrams and photographs from clinical cases, cover radiography, endoscopy, cytology, gross and microscopic pathology, immunopathology, and electron microscopy. A list of abbreviations and references for additional reading further complement this reference book. Also, a set of symbols, defined in a key, is used to consistently represent immunological molecules and cells in diagrams throughout the book.

Book Information

Hardcover: 288 pages

Publisher: Iowa State University Press/Manson Publishing, Ltd; 1st U.S. edition (November 15, 1999)

Language: English

ISBN-10: 0813823404

ISBN-13: 978-0813823409

Product Dimensions: 7.9 x 0.8 x 10.6 inches

Shipping Weight: 2.4 pounds (View shipping rates and policies)
