Synopsis

BE PREPARED TO HAVE YOUR MIND BLOWN Does the U.S. military have the ability to time travel? Will the world as we know it end sooner than we think? Has our timeline been changed without any of us knowing it? Is there at least one off world Earth colony in existence? Does the U.S. military have signed treaties with the Greys, the Reptilians and the Tall Whites? Does the U.S. military have an elite group of genetically- engineered cloned super soldiers? John Titor II served as commander of the 177th Time Travel Division at Area 51 from the years 2030 to 2036. He has traveled beyond and back. His life story is told here for the very first time as he reveals the hidden truths behind humanity's biggest cover-ups.

This is a work of Fiction pretending to be a biography. How do I know? The author's description of the world of 2050 is a straight line projection of Al Gore's movie "An Inconvenient Truth": a sea level rise of 50 feet, temperatures 20 - 30 degrees higher, global starvation and civil disorder. The bad news for this dystopian future is that the Earth is entering a period of cooling which will last through to the 2040s based on the 206 year Sun spot cycle and historical experience. This period of cooling will be similar to the Maunder or Dalton Minimums. The author also makes the claim that in 2050 CO2 has increased above 400 ppm, as if that's a serious problem. I'm guessing he forgot that plants need CO2, that in the distant past CO2 levels were much higher and that present day green house operators often pump extra CO2 for increased plant growth. The author later describes traveling to 230 BC to the time of the Yellow Emperor in what is now China and a battle between an invading

force of Annunaki and his time warriors supporting the Chinese. He introduces two advanced weapons: a magazine fed crossbow and chrome plated swords. Extraterrestrial allies disable Annunaki space ships and weapons with an electromagnetic pulse weapon (EMP). There are serious problems with this story. That particular crossbow is a relatively low power weapon - more like a .22 cal pistol compared to a .308 cal rifle. The chrome plating was a 10 - 15 micron chromium oxide layer applied to the bronze swords found in the 1st Emperor's terracotta army which acted as an anti-corrosion layer but did not give the bronze swords any special cutting ability. And finally, the EMP story is suspicious. Military equipment today is often shielded against EMP.
