Calculations For The Veterinary Professional, Revised Edition

Synopsis

Veterinary professionals perform countless calculations on a daily basis. Calculations for the Veterinary Professional combines the perspectives of a pharmacist, the author, Vicki McConnell, and a clinician, the editor, Branston Ritchie, to guide the reader through step-by-step computations followed by practice problems at the end of each section. Veterinary practitioners, students, and technicians will find this a valuable reference. The following topics are covered in this manual: fractions and decimals, scientific notation, temperature and units of volume, equations, ratios and proportions, physical chemistry, dilution and drug dosing by body surface area, IV drips, oral suspensions, eye drop calibrations, nutritional support and metabolic scaling, and toxicology and blood levels.

Book Information

Paperback: 288 pages

Publisher: Wiley-Blackwell; 1 edition (February 11, 2002)

Language: English

ISBN-10: 0813808790

ISBN-13: 978-0813808796

Product Dimensions: 5.5 x 0.7 x 8.5 inches

Shipping Weight: 15.7 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars See all reviews (2 customer reviews)

Customer Reviews

I will admit that I am not a math genius but this book helps. You don't have to be a mathematician or be exceptionally versed in math to comprehend this. I practiced quite often to keep mind sharp and alert. I no longer work at a Vet's office, so reviewing this book helps me to make sure that I haven't lost my touch. I recommend this book for anyone looking to go into an animal related field of study. This should be given at Vet schools or be on the shelves for reference.

great for cal
