Diagnostic Cytology And Hematology Of The Dog And Cat, 2e

Synopsis

Cytologic evaluation of blood, fluid, and tissue specimens is a powerful diagnostic aid in veterinary medicine. **DIAGNOSTIC CYTOLOGY AND HEMATOLOGY OF THE DOG AND CAT** provides the most comprehensive reference available. Introductory chapters cover sample collection and slide presentation, and flow charts guide readers to the most likely cytologic diagnosis. A new chapter on peripheral blood provides a basic understanding of hematology techniques and interpretations. Additionally, the book contains more than 400 illustrations, most in full color, and features a color plate section with 64 illustrations of cell types and infectious agents for quick viewing and comparison.* Offers the most comprehensive information available on all aspects of diagnostic cytology in dogs and cats. * Provides introductory chapters on sample collection and slide presentation. * Uses a body system organization to ensure a logical presentation of material. **NEW TO THIS EDITION:** * Provides updated information on all aspects of cytologic diagnosis in dogs and cats. * Includes a new chapter on peripheral blood for greater understanding of hematology techniques. * Features 195 new illustrations. * Uses flow charts on sample evaluation to aid in cytologic diagnosis. * Incorporates material from 24 expert contributors to provide the most up-to-date information available. * Provides quick photographic and textual reference in a detailed index.

Customer Reviews

For those who want to take advantage of all the means of getting information, in this case, cytology,

this is a very good book. It has several illustrating images and describes perfectly on text, what you should see. This is a book I recommend every clinician to have.

It's easy to understand and has a worth to keep

Great just what we needed
